**Subject:** Consumers Energy & it's high cost this year

I as a sour citizen am upset about the charges Consumers Energy is charging. The excuse of it being the colder weather is crap. My furnace runs every 15 minutes to blow heat whether it's 20 or 40 out. It doesn't change the amount of gas coming through every 15 minutes. So why should the cost be more from one month to another. I understand the price of gas it's self goes up & down but not the price Consumers is charging. I urge you guys to address the matter and see why since the Smart Meters where installed that the prices have gone WAY up. When it gets to the point where people are having to decide to skimp on other bills in order to pay Consumers to keep their kids warm, it's ridiculous.

Thank you,
